Welcome to the Teaching & Learning Additional Languages Cluster

The Teaching & Learning Additional Languages cluster is dedicated to exploring theory, practice and contemporary issues pertaining to teaching and learning additional languages.
in diverse instructional environments including elementary and secondary schools as well as various adult learning contexts and informal learning settings. The focus goes beyond teaching and learning English and French to consider indigenous languages as well as world languages.

In courses, students explore and critique research, curriculum and practice from a range of perspectives. We invite you to join us to engage in collegial and intellectual discussion of topics such as reading and writing in an additional language, language immersion, language policy and planning, assessment of language proficiency, critical language pedagogy, the use of technology in language learning, and diverse language teaching methodologies.

Applications for 2018-19 are now open! Apply to the LLE Master of Education program and indicate your interest in the Teaching & Learning Additional Languages cluster in your Statement of Intent.

Teaching & Learning Additional Languages Courses
